

DMA – One Family

Most versatile modular amplifier series!

◆ Highlights and strengths

- modular configurations
- flexible usage
- adaptable in many ways
- customizing possible
- near unlimited combinations
- endless field of applications
- outstanding reliability

◆ Used in/for

- automation systems
- offshore and marine
- industrial applications
 - machine building
 - test applications
 - chemical industry
- general plant construction
 - mobile applications

◆ Stand alone versions

- all kinds of valves can be used
- open loop and closed loop versions
- special versions for Hawe valves
- special LVDT version
- many options for special I/Os

◆ Bus-Interface versions

- PROFIBUS
- PROFINET
- ETHERNET I/P
- CAN-Open
- Single and multi module
